### **RELEASE NOTES**

#### **New Features:**

- Smart beacons are now supported for Android Platform. Check the API documentation to know how to correctly use it.
- Support for IOS8 now using the new WKWebView control instead of the old Webview
- Added a new Setting in Security Tab in MobileEmulator that will prevent the application launch if the device has been modified (jailbreak/rooted)
- Many Security Enhancements:
  - Updated the Jailbreak/Rooting detection methods with new and better mechanisms
  - Improved the Web Certificates Validation Process
  - Implemented mechanisms to further ensure Internal Framework Communication security

#### **Bug Fixing:**

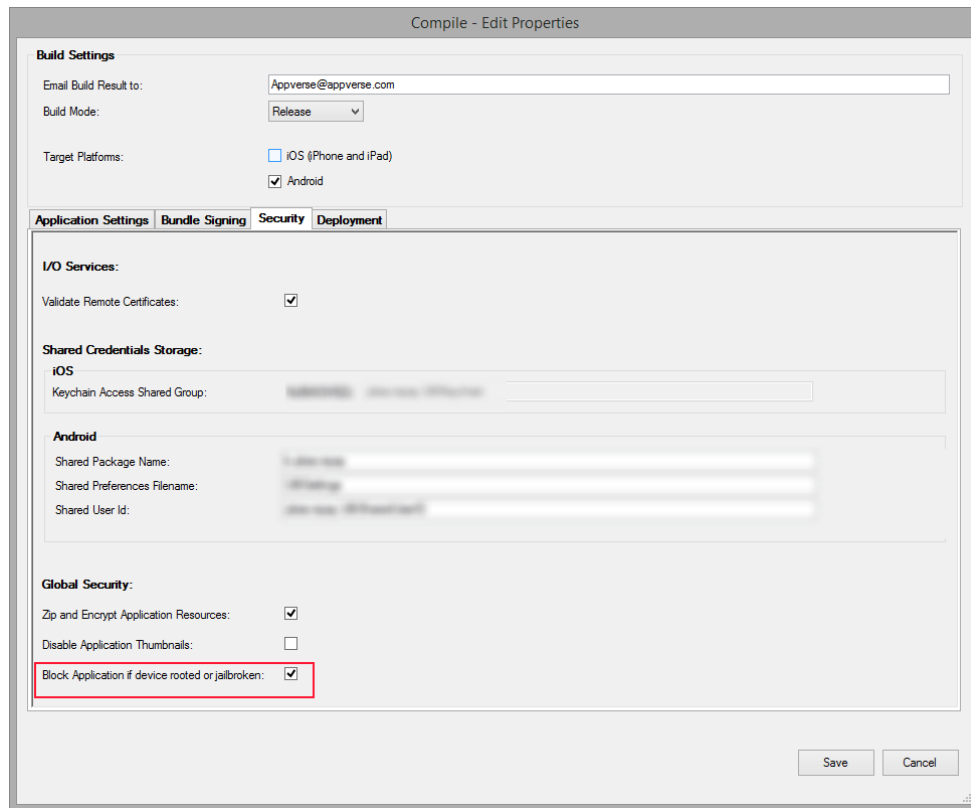

- Path Traversal: Fixed a bug that allowed exploiting the FileSystem API to access folders from outside the application
